

Building the Bridal Business

Packages, trial fees, team hierarchy, and pricing a service with irreversible stakes

Learning Objectives

- Structure bridal packages covering trial, wedding-day, and touch-up service
- Price a service accounting for its irreversible stakes and date exclusivity
- Build a bridal team hierarchy for larger, multi-person bookings
- Manage seasonal demand across a wedding-season calendar

Pricing for a day that cannot be rebooked

Bridal pricing should reflect more than time spent — it reflects the exclusivity of holding a single date for a single client, the irreversible stakes of the work, and the backup infrastructure from Module Nine that a normal appointment does not require. A clear package structure typically separates the trial fee, the wedding-day rate, per-person bridal-party rates, a stated travel fee, and an overtime rate for any booking running past its scheduled window.

Building a bridal team

Larger bookings benefit from a clear hierarchy: a lead artist responsible for the bride's own look and final sign-off, and assistants handling bridal-party members under the lead's direction and quality check. Assign roles before the morning begins, not improvised on arrival, so the bride's own timeline is never delayed by a team still deciding who does what.

Seasonal demand and the booking calendar

Wedding season creates genuine surge demand, and overbooking a single date across multiple clients — even with a team — risks the exact irreversible failure this entire course has been built to prevent. Set a firm cap on bookings per date well before season begins, and hold to it even when a tempting late booking arrives.
