

The Application — Step by Step

The complete professional makeup service, and the experience that turns a face of colour into an Amber service

Learning Objectives

- Perform the complete Amber makeup protocol from skin prep through finish
- Place contour, blush, and highlight correctly relative to a client's specific bone structure
- Apply eye makeup with technique appropriate to the client's eye shape
- Set a finished look appropriately for its occasion and duration

Seven steps, one coherent face

A complete service is not seven isolated techniques performed in sequence. Each step sets up the one after it — rushed prep undermines flawless base work, and a base applied without reference to Module One's structure undermines even the most skilled contour. Work the steps in order, and let each one inform the next.

Step 1 · Prep

Cleanse, treat, and moisturise according to the client's skin type (Course I), allow full absorption, then apply a primer suited to her specific concern — hydrating for dry or mature skin, mattifying for oily or combination skin, colour-correcting where Module Two's principles call for it.

Step 2 · Base

Apply correctly shade- and undertone-matched foundation (Module Two) in thin, buildable layers (Module Six), concealing only where genuinely needed rather than as a second full-face layer.

Step 3 · Sculpt

Using the bone landmarks from Module One, place contour just beneath the cheekbone's natural hollow, along the jawline if definition is wanted, and lightly at the temples and sides of the nose if appropriate to the look. Highlight the high points light naturally hits: the tops of the cheekbones, the brow bone, the centre of the nose, and the cupid's bow.

◆ Figure 11.1 · Contour and Highlight Placement

Contour follows shadow's natural path beneath the cheekbone; highlight follows the points light already hits.

Step 4 · Eyes

Shape brows first — they frame the entire eye area and should be completed before eyeshadow, not after. Apply eyeshadow working from a transition shade in the crease outward, building depth gradually rather than starting with the darkest shade. Adjust liner placement to eye shape: a soft, slightly winged line generally opens rounder eyes, while a closer, softer line suits already-elongated eyes. Finish with mascara or lashes appropriate to the occasion.

Step 5 · Cheeks and lips

Apply blush to the natural flush point — typically the apples of the cheeks, blended up and back toward the temple — after contour and highlight, so it sits correctly relative to the sculpted structure beneath it. Finish lips with liner matched to the chosen lip colour, filled fully to prevent patchy wear, per the removal and longevity principles from Module Six.

Step 6 · Set

Set with a fine, translucent powder only where oil control is genuinely needed (Module Six), and a setting spray appropriate to the occasion's duration and the flash-photography considerations from Module Seven.

Step 7 · Check and send off

Perform the two-light check from Module Seven, confirm the finished look against what was agreed in the consultation, and close with brief removal guidance appropriate to the formulas used.

Practical Activity · The Full Protocol

Perform a complete makeup service on a partner or model, narrating each of the seven steps aloud. Have an observer note anything skipped or rushed. **Photograph the finished result in at least two lighting conditions — this becomes part of your capstone portfolio.**
